

Zepto-Inventory-Analytics-SQL-Tableau

Zepto Company

Zepto is an Indian quick-commerce startup founded in 2021 by Aadit Palicha and Kaivalya Vohra.

What does Zepto do?

- Delivers groceries and daily essentials in 10–15 minutes.
- Operates through a network of dark stores (small warehouses dedicated to online orders).
- Offers products such as:
 - Fruits and vegetables
 - Dairy products
 - Snacks and beverages
 - Personal care items
 - Household essentials
 - Baby care products

Business Model

1. Customers place orders through the mobile app.
2. The nearest dark store receives the order.
3. Staff pick and pack the products.
4. Delivery partners deliver the order quickly.

About the Zepto SQL Project

The Zepto SQL Data Analysis Project is a portfolio project that uses a Zepto inventory dataset to practice SQL and solve real business problems.

Dataset Contains

- SKU ID
- Product Name
- Category
- MRP
- Discount Percentage
- Selling Price
- Available Quantity
- Product Weight
- Out of Stock Status
- Quantity

Objectives of the Project

- Clean and prepare the dataset.
- Analyze product pricing and discounts.
- Identify out-of-stock products.
- Compare category-wise inventory.
- Generate business insights using SQL.

SQL Concepts Used

- SELECT Statements
- WHERE Clause
- ORDER BY
- GROUP BY
- Aggregate Functions
- CASE Statements
- Subqueries
- Common Table Expressions (CTEs) & Window Functions

SQL CODE :

Create table zepto (

SKU_ID SERIAL PRIMARY KEY ,

Category VARCHAR(50),

name VARCHAR (100) NOT NULL,

mrp NUMERIC (8,2),

discountPercent NUMERIC (5,2),

availableQuantity INTEGER,

discountedSellingPrice NUMERIC(8,2),

weightInGms INT,

outOfStock boolean,

quantity int

)

select * from ZEPTO

alter table ZEPTO

update ZEPTO

set discountedSellingPrice = discountedSellingPrice/100

---Beginner Level----

--1. count the number of rows present in table / Total number of products

```
SELECT COUNT(*) FROM ZEPTO
```

--2 check the null data present in the table

```
SELECT * FROM ZEPTO
```

```
WHERE name IS NULL
```

```
OR category IS NULL
```

```
OR mrp IS NULL
```

```
OR discountpercent IS NULL
```

```
OR discountedsellingprice IS NULL
```

```
OR weightingms IS NULL
```

```
OR outofstock IS NULL
```

```
OR quantity IS NULL;
```

--3. Count distinct categories in table?

```
select distinct(category), count(category) from zepto  
group by category
```

--4. Find all out-of-stock products

```
select name, category, outOfStock, mrp from zepto  
where outOfStock = 'stock_out'
```

--5. Find products with MRP greater than ₹500

```
select name, category, mrp from zepto  
where mrp>500
```

--6. Top 10 most expensive products

```
select distinct(name), category, mrp, sum(availableQuantity )from zepto
group by name, category, mrp
order by mrp desc
limit 10
```

---Intermediate Level---

--7. Average MRP by category

```
select avg(mrp) as average_mrp from zepto
```

--8. Average discount percentage by category

```
select avg(discountPercent) as average_discountPercent from zepto
```

--9. Products with discount greater than 40%

```
select distinct(name), category , discountpercent from zepto
```

```
where discountpercent > 40
```

```
order by discountpercent desc
```

--10. Difference between MRP and Selling Price

```
select name, category, mrp, discountedSellingPrice, (mrp-discountedSellingPrice) as
profit_lose from zepto
```

--11. Which categories have the largest number of SKUs?

```
select category, count(SKU_ID) from zepto
```

```
group by category
```

```
order by count(SKU_ID)
```

--12. Premium products with low discounts

```
--MRP > ₹1000, Discount < 10%  
select name, mrp, discountpercent from zepto  
where mrp>1000 and discountpercent<10  
order by mrp desc
```

-- Advanced Level

--13. Category-wise revenue opportunity

```
select category, (discountedSellingPrice *quantity) as revenue from zepto  
group by category,(discountedSellingPrice *quantity)  
order by (discountedSellingPrice *quantity) desc
```

--14. Price segmentation

--Create groups:

--Budget (< ₹200)

--Mid-range (₹200–₹500)

--Premium (> ₹500)

```
select name, category, mrp, discountedSellingPrice ,  
       case  
         when discountedSellingPrice <200 then 'budget'  
         when discountedSellingPrice between 200 and 500 then 'mid_range'  
         else 'premium'  
       end as segmentation  
       from zepto
```

--15. Discount segmentation

--Create groups:

(Low Discount

Medium Discount

High Discount)

```
select name, category, mrp, discountPercent,  
case  
when discountPercent > 10 then 'low_discount'  
when discountPercent between 10 and 30 then 'medium_discount'  
else 'high_discount'  
end as dis_segment  
from zepto  
order by discountPercent
```

--16. Identify pricing anomalies(there products where Selling Price exceeds MRP?)

```
select name, category, mrp, discountedSellingPrice from zepto  
where (discountedSellingPrice - mrp) > 0
```

--17. Find duplicate product names

```
select name, count(name) from zepto  
group by name  
having count(name) > 1  
order by count(name) desc
```

--18. Top categories contributing to inventory

```
select category, sum(discountedSellingPrice) as total_SP FROM ZEPTO
```

```
GROUP BY CATEGORY
```

```
ORDER BY sum(discountedSellingPrice) DESC
```

--19. Rank products by discount within each category

```
SELECT CATEGORY, SUM(discountPercent)AS DISCOUNT, RANK () OVER (order by  
SUM(discountPercent) desc)as ranking FROM ZEPTO
```

```
group by caterogy
```
